HCU Glue Heating Conditioning Unit

OMMA's HCU adhesive heating and conditioning unit makes it possible to provide safe heating for specific polyurethane adhesives allowing constant viscosity and excellent constant application.

HCU's Process advantages:

- Glue viscosity remains constant
- Adhesive replacement is not necessary during seasonal temperature changes
- Foaming effect is reduced
- Glue is kept heating: dosing rollers (ideally with steel dosing rollers).
- HCU heating unit is electrically fed and is complete with temperature control, circulation pump and inox expansion tank and can be interfaced with the main control of the glue spreader.
- HCU is available in different "sizes" to accommodate specific task.

For more information about the HCU Glue Heating Conditioning Unit contact sales@walcomachine.com.
