ULTIMATE COATING AND LAMINATION TECHNOLOGY

OMMA/WALCO LOG SLITTER

INDUSTRIAL ROLL SLITTER

Novacel Special Machines is the fusion of two acquired companies, **Omma and Walco**, uniting their expertise to manufacture and export **laminating and coating machines** for a wide range of materials.

Fully automatic, our Log Slitter allows the **fast and accurate cutting of the initial coil into two or more rolls** of smaller width, without rewinding process.

It is capable of cutting all types of synthetic materials - plastic film - adhesive film - protective film - coated materials - textiles - technical materials - rubber - PVC-PU-PE films - etc.

STANDARD CONFIGURATION

- Rotary cutting blade
- Protective cabin and soundproofing
- Motorized loading/unloading
- Sliding front door access with interlock
- Speed regulation with inverter
- Direction of coil rotation selectable
- Replaceable coil shaft
- Scrap aspiration hood
- Blade lubrication with nebulized liquid
- Automatic position setting (through HMI)
- Motorized height adjustable roll support tray
- Structure with adjustable feet

Cutting system

Fully automatic

Thickness

Cuttable diameter of the coil from 200 to 500 mm

Working widths

Up to 2,860 mm
