

TX PRECISION

Expert in industrial laminator

WALCO® TX Precision laminator is an in-line and off-line laminator for application with high precision automatic cutting system.

Standard configuration

- Top side film application
- Top supply shaft with adjustable brake assembly for film tension
- Rolls laminators covered with special rubber
- Motorized thickness adjustment
- Variable speed
- Digital display

Main options

- Double side film application
- Antistatic equipment
- Smart Tech Protection innovation solutions
- Wheels for displacement

Added value

Fully adjustable

Possibility to apply several pieces of protective film on the same panel

Automatic film tension control

Automatic length calculation based on each piece

High level of sophistication

Thickness

Up to 80 mm

Width

1,400 up to 3,000 mm

Cutting system

High precision automatic cutting system: cut to the edge, negative cut and positive cut
